## ABOUT ENTERPRISE SURVEYS

The Enterprise Surveys focus on the many factors that shape the business environment. These factors can be accommodating or constraining for firms and play an important role in whether a country will prosper or not. An accommodating business environment is one that encourages firms to operate efficiently. Such conditions strengthen incentives for firms to innovate and to increase productivity—key factors for sustainable development. A more productive private sector, in turn, expands employment and contributes taxes necessary for public investment in health, education, and other services. In contrast, a poor business environment increases the obstacles to conducting business activities and decreases a country's prospects for reaching its potential in terms of employment, production, and welfare.

The Enterprise Surveys are conducted by the World Bank and its partners across all geographic regions and cover small, medium, and large companies. The surveys are administered to a representative sample of firms in the non-agricultural formal private economy. The universe of the survey, also known as the population, is consistently defined in all countries and includes the entire manufacturing sector, the services sector, and the transportation and construction sectors. Public utilities, government services, health care, and financial services sectors are not included in the universe. Uniform universe, uniform methodology of implementation, and a core questionnaire are the basis of the Global methodology under which most Enterprise Surveys have been implemented since 2006.

The Enterprise Surveys collect a wide array of qualitative and quantitative information through face to face interviews with firm managers and owners regarding the business environment in their countries and the productivity of their firms. The topics covered in Enterprise Surveys include infrastructure, trade, finance, regulations, taxes and business licensing, corruption, crime and informality, finance, innovation, labor, and perceptions about obstacles to doing business.

The qualitative and quantitative data collected through the surveys connect a country's business environment characteristics with firm productivity and performance. The Enterprise Survey is useful for both policymakers and researchers. The surveys are repeated over time to track changes and benchmark the effects of reforms on firms' performance.

## LIST OF INDICATORS

---

Introduction to ES Indicators, By Subgroup.....	13
Indicator Comparability.....	14
Computing Regional and Income Group Averages.....	14
Handling of Outliers.....	14
Definitions of Subgroup .....	15
Regulations.....	16
[reg1] Senior management time spent in dealing with requirements of government regulation (%).....	17
[bus2] Days to obtain operating license.....	18
[bus3] [B-READY] Days to obtain a construction-related permit [median].....	19
[bus1] Days to obtain an import license .....	20
[reg9] [B-READY] Days to receive payment under government contract.....	21
[reg10] [B-READY] Percent of firms visited or inspected for health or safety.....	22
[reg11] [B-READY] Percent of firms with a report issued for health or safety inspection .....	23
[bus5] Percent of firms identifying business licensing and permits as a major or very severe constraint.....	24
[reg8] Percent of firms identifying access to land as a major or very severe constraint.....	25
[reg12] [B-READY] Perceptions index of access to land as a constraint.....	26
[reg7] Percent of firms identifying political instability as a major or very severe constraint.....	27
Taxes .....	28
[reg6] Percent of firms visited or required to meet with tax officials.....	29
[reg2] Number of visits or required meetings with tax officials .....	30
[reg2_c] If there were visits, Average number of visits or required meetings with tax officials .....	31
[tax1] [B-READY] Hours spent on tax compliance annually [median] .....	32
[tax2] [B-READY] Percent of firms filing taxes electronically .....	33
[tax3] [B-READY] Percent of firms paying taxes electronically.....	34
[tax4] [B-READY] Weeks until the final tax audit report [median].....	35
[tax5] [B-READY] Weeks to receive VAT refund [median] .....	36
[tax6] [B-READY] Percent of firms reporting too long or complicated refund process as the main reason for not applying for a VAT refund, among those providing a reason other than no need .....	37
[tax7] [B-READY] Reported share of social security and employment-based taxes in annual cost of labor .....	38
[tax8] [B-READY] Reported effective income-based tax rate .....	39
[reg4] Percent of firms identifying tax rates as a major or very severe constraint .....	40

[reg5] Percent of firms identifying tax administration as a major or very severe constraint.....	41
Finance .....	42
[fin23] Percent of firms that are fully credit constrained .....	43
[fin24] Percent of firms that are partially credit constrained .....	45
[fin25] Percent of firms that are credit unconstrained .....	48
[fin15] Percent of firms with a checking or savings account.....	50
[fin14] Percent of firms with a bank loan/line of credit.....	51
[fin11] Proportion of loans requiring collateral (%).....	52
[fin10] Value of collateral needed for a loan (% of the loan amount).....	53
[fin26] [B-READY] Percent of firms reporting unfavorable rates, collateral, or procedures as main reason for not applying for loans .....	54
[fin20] Percent of firms not needing a loan.....	55
[fin27] [B-READY] Days to receive a decision on loan application .....	56
[fin21] Percent of firms whose recent loan application was rejected .....	57
[fin12] Percent of firms using banks to finance investments .....	58
[fin1] Proportion of investment financed internally (%) .....	59
[fin2] Proportion of investment financed by banks (%).....	60
[fin3] Proportion of investment financed by supplier/customer credit (%).....	61
[fin4] Proportion of investment financed by equity or stock sales (%).....	62
[fin5] Proportion of investment financed by other financing (%).....	63
[fin13] Percent of firms using banks to finance working capital .....	64
[fin22] Percent of firms using supplier/customer credit to finance working capital .....	65
[fin6] Proportion of working capital financed internally (%) .....	66
[fin7] Proportion of working capital financed by banks (%).....	67
[fin8] Proportion of working capital financed by supplier/customer credit (%).....	68
[fin9] Proportion of working capital financed by other financing (%).....	69
[fin19] Working Capital External Financing (%) .....	70
[t2] Percent of firms with an annual financial statement reviewed by external auditors.....	71
[fin28] [B-READY] Proportion of sales paid by customers electronically.....	72
[fin29] [B-READY] Days to receive the main type of electronic payment.....	73
[fin30] [B-READY] Cost to receive main type of electronic payment (% of transaction) .....	74
[fin31] [B-READY] Proportion of payments made electronically .....	75
[fin32] [B-READY] Cost to make main type of electronic payment (% of transaction).....	76
[fin16] Percent of firms identifying access to finance as a major or very severe constraint .....	77

[fin33] [B-READY] Perceptions index of access to finance as a constraint.....	78
[fin17] Proportion of sales that are pre-paid (%).....	79
[fin18] Proportion of sales sold on credit (%) .....	80
Infrastructure and Climate .....	81
[in16] Percent of firms experiencing electrical outages .....	82
[in2] [B-READY] Number of electrical outages in a typical month.....	83
[in3] [B-READY] Duration, in hours, of a typical electrical outage [median].....	84
[in3_c] If there were outages, average duration in hours of a typical electrical outage.....	85
[in15] Average total time of power outages per month.....	86
[in4] [B-READY] Losses due to electrical outages (% of annual sales) [median] .....	87
[in4_c] If there were outages, average losses due to electrical outages (% of annual sales).....	88
[in9] [B-READY] Percent of firms owning or sharing a generator .....	89
[in10] Proportion of electricity from a generator (%) .....	90
[in10_c] If a generator is used, average proportion of electricity from a generator (%).....	91
[in1] [B-READY] Days to obtain an electrical connection, upon application [median] .....	91
[in12] Percent of firms identifying electricity as a major or very severe constraint.....	93
[in17] Percent of firms experiencing water insufficiencies* .....	94
[in18] [B-READY] Percent of firms experiencing water insufficiencies.....	95
[in6] Number of water insufficiencies in a typical month* .....	96
[in19] Number of water insufficiencies in a typical month .....	97
[in20] Duration, in hours, of a typical water shortage.....	98
[in7] Duration, in hours, of insufficient water supplies* .....	99
[in7_c] If there were shortages, Average Duration in hours of the Water Shortage* .....	100
[in5] [B-READY] Days to obtain a water connection [median].....	101
[in21] [B-READY] Percent of firms experiencing internet disruptions.....	102
[in22] [B-READY] Days to obtain internet connection [median] .....	103
[in14] Proportion of products lost to breakage or spoilage during shipping to domestic markets (%)* .....	104
[in11] Percent of firms identifying transportation as a major or very severe constraint.....	105
[in23] [B-READY] Perceptions index of transportation as a constraint.....	106
[in24] Percent of firms experiencing damage of physical assets due to extreme weather.....	107
[in25] Percent of firms monitoring own CO2 emissions over last 3 years .....	108
[in26] Percent of firms adopting energy management measures to reduce emissions over last 3 years.....	109
Gender .....	110
[gend1] Percent of firms with women participation in ownership.....	111

[gend6] Percent of firms with majority women ownership.....	112
[gend4] Percent of firms with a woman top manager .....	114
[gend7] [B-READY] Percent of firms owned or managed by women among those that held a government contract in last 3 years.....	115
[gend2] Proportion of permanent full-time workers that are women (%).....	116
[gend5] Proportion of permanent full-time production workers that are women (%)*.....	117
[gend3] Proportion of permanent full-time non-production workers that are women (%)* .....	118
[gend8] Proportion of women workers offered formal training over last fiscal year (%)* .....	119
[gend9] Proportion of women workers offered formal training over last fiscal year (% , only service sector).....	120
Trade .....	121
[tr10] Percent of firms exporting directly or indirectly at least 1% of sales .....	122
[tr15] Percent of firms exporting directly at least 1% of sales .....	123
[tr17] Percent of firms exporting directly or indirectly at least 10% of sales.....	124
[tr16] Percent of firms exporting directly at least 10% of sales.....	125
[tr5] Proportion of total sales that are exported directly (%).....	126
[tr6] Proportion of total sales that are exported indirectly (%).....	127
[tr4] Proportion of total sales that are domestic sales (%) .....	128
[tr1] Days to clear direct exports through customs* .....	129
[tr18] [B-READY] Days for exported goods to clear all border control agencies [median].....	130
[tr19] [B-READY] Percent of firms that export at least some products via parcel service .....	131
[tr20] [B-READY] Typical costs to comply with all export requirements (% of value of goods exported) .....	132
[tr12] Products exported directly lost due to theft (%).....	133
[tr13] Products exported directly lost due to breakage or spoilage (%).....	134
[tr11] Percent of firms using material inputs and/or supplies of foreign origin* .....	135
[tr21] Percent of firms using material inputs and/or supplies of foreign origin .....	136
[tr8] Proportion of total inputs that are of foreign origin (%)* .....	137
[tr22] Proportion of total inputs that are of foreign origin (%) .....	138
[tr7] Proportion of total inputs that are of domestic origin (%)* .....	139
[tr2] Days to clear imports from customs* .....	140
[tr23] Days to clear imports from customs .....	141
[tr24] [B-READY] Days for imported goods to clear all border control agencies [median] .....	142
[tr25] [B-READY] Typical costs to comply with all import requirements (% of value of goods imported) .....	143
[tr9] Percent of firms identifying customs and trade regulations as a major or very severe constraint.....	144
[tr26] [B-READY] Perceptions index of customs and trade regulations as a constraint .....	145

Competition and Public Procurement.....	146
[comp1] [B-READY] Index of market share of the largest competitor (excluding firms whose main market is international).....	147
[comp2] [B-READY] Percent of firms reporting less than two competitors in their main product's main market (excluding firms whose main market is international).....	148
[comp3] [B-READY] Percent of firms reporting between two and five (inclusive) competitors in their main product's main market (excluding firms whose main market is international).....	149
[comp4] [B-READY] Percent of firms reporting more than five competitors in their main product's main market (excluding firms whose main market is international).....	150
[comp5] [B-READY] Percent of firms that cannot increase prices more than competitors without losing customers.....	151
[comp6] [B-READY] Percent of firms reporting their prices to be regulated.....	152
[comp7] [B-READY] Index of change of level of competition over last year.....	153
[comp8] [B-READY] Index of difficulty to switch internet providers.....	154
[comp9] [B-READY] Perceptions of the degree of difficulty to comply with government contract tender requirements.....	155
Corruption.....	156
[graft3] Bribery incidence (percent of firms experiencing at least one bribe payment request).....	157
[graft2] Bribery depth (% of public transactions where a gift or informal payment was requested).....	159
[graft1] Graft index.....	161
[corr1] Percent of firms expected to give gifts in meetings with tax officials.....	163
[corr2] Percent of firms expected to give gifts to secure government contract.....	164
[corr3] Value of gift expected to secure a government contract (% of contract value).....	165
[corr10] Percent of firms expected to give gifts to get an operating license.....	166
[corr9] Percent of firms expected to give gifts to get an import license.....	167
[corr8] Percent of firms expected to give gifts to get a construction permit.....	168
[corr6] Percent of firms expected to give gifts to get an electrical connection.....	169
[corr7] Percent of firms expected to give gifts to get a water connection.....	170
[corr4] Percent of firms expected to give gifts to public officials "to get things done".....	171
[corr11] Percent of firms identifying corruption as a major or very severe constraint.....	172
Informality.....	173
[infor1] Percent of firms competing against unregistered or informal firms.....	174
[infor4] Percent of firms formally registered when they started operations.....	175
[infor5] Number of years firm operated without formal registration.....	176

[infor2] Percent of firms identifying practices of competitors in the informal sector as a major or very severe constraint.....	177
Dispute Resolution.....	178
[disp1] Percent of firms that had any commercial dispute.....	179
[disp2] Percent of firms that use courts, arbitration, mediation, or conciliation to resolve or attempt to resolve its commercial disputes.....	180
[disp3] [B-READY] Perceptions of courts being independent and impartial in resolving commercial disputes.....	181
[disp4] [B-READY] Perceptions of arbitration being a reliable alternative to courts for resolving commercial disputes.....	182
[disp5] [B-READY] Perceptions of mediation being a reliable alternative to courts for resolving commercial disputes.....	183
[crime9] Percent of firms identifying the courts as a major or very severe constraint.....	184
[disp6] [B-READY] Perceptions index of courts as a constraint.....	185
[corr12] Percent of firms believing the court system is fair, impartial and uncorrupted.....	186
Workforce.....	187
[wk1] [B-READY] Percent of firms offering formal training over last fiscal year.....	188
[wk2] Proportion of workers offered formal training over last fiscal year (%)*.....	189
[wk8] Years of the top manager's experience working in the firm's sector.....	190
[wk20] Percent of firms where the largest owner is also the top manager.....	191
[wk14] Number of workers.....	192
[wk21] Number of permanent full-time equivalent workers.....	193
[wk11] Number of temporary workers.....	195
[wk12] Number of permanent full-time workers.....	196
[wk3] Number of permanent skilled production workers*.....	197
[wk4] Number of permanent unskilled production workers*.....	198
[wk6] Number of permanent production workers*.....	199
[wk7] Number of permanent non-production workers*.....	200
[wk18] Proportion of permanent workers, out of all workers.....	201
[wk22] Proportion of permanent workers, out of all permanent full-time equivalent workers.....	202
[wk17] Proportion of temporary workers out of all workers.....	204
[wk15] Proportion of production workers, out of all permanent workers*.....	205
[wk16] Proportion of non-production workers out of all permanent workers*.....	206
[wk19] Proportion of skilled workers, out of all permanent production workers (%)*.....	207

[wk23] Proportion of permanent full time workers that completed high school.....	208
[wk13] Proportion of unskilled workers out of all permanent production workers (%)* .....	209
[wk24] [B-READY] Weeks to dismiss a full-time permanent worker .....	210
[wk25] [B-READY] Weeks paid in severance .....	211
[wk26] [B-READY] Percent of firms involved in labor dispute over last 3 years.....	212
[wk27] [B-READY] Months to resolve labor dispute.....	213
[wk9] Percent of firms identifying labor regulations as a major or very severe constraint .....	214
[wk28] [B-READY] Perceptions index of labor regulations as a constraint .....	215
[wk10] Percent of firms identifying an inadequately educated workforce as a major or very severe constraint .....	216
Management Practices.....	217
[mgmt1] Management practices index.....	218
[mgmt2] Score on action when a problem arose .....	219
[mgmt3] Score on number of performance indicators monitored.....	220
[mgmt4] Score on time focus of production/service provision targets .....	221
[mgmt5] Score on achievability of production/service provision targets.....	222
[mgmt6] Score on knowledge of production/service provision targets.....	223
[mgmt7] Score on basis of managers' performance bonuses .....	224
[mgmt8] Score on extent to which non-managers are promoted based on performance .....	225
[mgmt9] Score on extent to which under-performing non-managers are reassigned or dismissed.....	226
Innovation and Technology.....	227
[t7] Percent of firms that introduced a new product/service over last 3 years.....	228
[t8] Percent of firms whose new product/service is also new to the main market.....	229
[t9] Percent of firms that introduced a process innovation over last 3 years .....	230
[t10] Percent of firms that spend on R&D in the last fiscal years .....	231
[t11] [B-READY] Percent of firms that introduced a new product/service and process over last 3 years, and spent on R&D over last fiscal year (excluding small firms).....	232
[t1] [B-READY] Percent of firms with an internationally-recognized quality certification.....	233
[t4] Percent of firms using technology licensed from foreign companies* .....	234
[t5] Percent of firms having their own web site.....	235
Firm Profile.....	236
[perf1] Real annual sales growth (%) .....	237
[perf2] Annual employment growth (%).....	238

[perf3] Real annual labor productivity growth (%).....	239
[perf4] Percent of firms buying fixed assets .....	241
[t3] Capacity utilization (%)*.....	242
[car1] Age of the establishment (years).....	243
[car7] Percent of firms with at least 10% of foreign ownership .....	244
[car8] Percent of firms with at least 10% of government/state ownership .....	245
[car2] Proportion of private domestic ownership in a firm (%) .....	246
[car3] Proportion of private foreign ownership in a firm (%) .....	247
[car4] Proportion of government/state ownership in a firm (%) .....	248
[car5] Proportion of other ownership in a firm (%).....	249
[car6] Proportion of a firm held by the largest owner(s) (%).....	250
[lform3] Percent of firms with legal status of Sole Proprietorship .....	251
[lform] Legal status .....	252
[lform_max] Most common legal form.....	253
[lform1] Percent of firms with legal status of publicly listed company .....	254
[lform2] Percent of firms with legal status of privately held Limited Liability Company .....	255
[lform4] Percent of firms with legal status of Partnership .....	256
[lform5] Percent of firms with legal status of Limited Partnership .....	257
[lform6] Legal status - Other .....	258
Biggest Obstacle .....	259
[obst1] Percent of firms choosing access to finance as their biggest obstacle .....	260
[obst2] Percent of firms choosing access to land as their biggest obstacle .....	261
[obst3] Percent of firms choosing business licensing and permits as their biggest obstacle .....	262
[obst4] Percent of firms choosing corruption as their biggest obstacle .....	263
[obst5] Percent of firms choosing courts as their biggest obstacle.....	264
[obst6] Percent of firms choosing crime, theft and disorder as their biggest obstacle .....	265
[obst7] Percent of firms choosing customs and trade regulations as their biggest obstacle.....	266
[obst8] Percent of firms choosing electricity as their biggest obstacle .....	267
[obst9] Percent of firms choosing inadequately educated workforce as their biggest obstacle .....	268
[obst10] Percent of firms choosing labor regulations as their biggest obstacle.....	269
[obst11] Percent of firms choosing political instability as their biggest obstacle .....	270
[obst12] Percent of firms choosing practices of the informal sector as their biggest obstacle .....	271
[obst13] Percent of firms choosing tax administration as their biggest obstacle.....	272
[obst14] Percent of firms choosing tax rates as their biggest obstacle .....	273

[obst15] Percent of firms choosing transportation as their biggest obstacle.....	274
CRIME .....	275
[crime1] Percent of firms paying for security .....	276
[crime10] Percent of firms experiencing losses due to theft and vandalism.....	277
[crime3] Losses due to theft and vandalism against the firm (% of annual sales).....	278
[crime3_c] If there were losses, average losses due to theft and vandalism (% of annual sales) .....	279
[crime2] Security costs (% of annual sales) .....	280
[crime2_c] If the establishment pays for security, average security costs (% of annual sales) .....	281
[crime5] Products shipped to supply domestic markets that were lost due to theft (% of product value)* .....	282
[crime8] Percent of firms identifying crime, theft and disorder as a major or very severe constraint.....	283
Descriptions of Indicator Updates.....	284
Appendix.....	287

#### Abbreviations

BEEPS	Enterprise Surveys implemented in Eastern Europe and Central Asian countries are also known as Business Environment and Enterprise Performance Surveys (BEEPS) and are jointly conducted by the World Bank and the European Bank for Reconstruction and Development.
ECA	Eastern European and Central Asia region
LAC	Latin America and the Caribbean region
EAP	East Asia and Pacific region
SAR	South Asia region
AFR	Africa region
MENA	Middle East and North Africa region

#### Notes

\* This indicator is computed using data from manufacturing firms only.

## INTRODUCTION TO ES INDICATORS, BY SUBGROUP

In addition to country-level statistics, Enterprise Survey (ES) indicators are presented by subgroups based on firm characteristics. Indicators from surveys following the **Global** sampling methodology are representative at the country level. However, more care is necessary when interpreting indicators by subgroups.

In the figure below, the drop-down menu on each country page allows the user to select how they wish to view an indicator. The user can view indicator values for the entire sample or by subgroups. Surveys following the **Global** methodology are stratified by business sector, location, and firm size. When analyzing ES indicators in these groupings, the results are representative of the associated populations<sup>1</sup>. However, since the **Global** sampling methodology does not stratify by gender of the top manager, exporter status, or ownership (ex post groupings), the intended level of precision is not guaranteed for indicator values by these groupings.

The screenshot shows a web interface with a navigation bar containing categories like Corruption, Crime, Finance, Firm Characteristics, Gender, Informality, Infrastructure, Innovation and Technology, Regulations and Taxes, Trade, and Workforce. Below the navigation bar is a table with columns for 'Indicator', 'Pakistan', 'South Asia', and 'World'. A dropdown menu is open over the 'View Data by Firm Subgroups' header, listing options: 'No Subgroups', 'Survey Design Strata', 'Location', 'Sector', 'Size', 'Ex post groupings', 'Exporter Type', 'Gender of Top Manager', and 'Ownership Type'. The 'Size' option is currently selected.

Indicator	Pakistan	South Asia	World
Percent of firms expected to give up or stop things done*	48.0	41.2	29.4
Percent of firms expected to give up or stop things done	12.7	21.2	18.8
Percent of firms expected to give up or stop things done	0.0	20.8	16.5

Surveys that are Non-Global do not yield results that are representative of the firm population in a country. Please check if a survey is Global or not, as this will greatly affect the interpretation of survey results.

<sup>1</sup> At the country level, and levels of stratification, sample averages are representative of the associated population when calculated with sampling weights.

## **INDICATOR COMPARABILITY**

Indicators are comparable across all the countries and years in surveys that followed the [Enterprise Surveys Global Methodology](#). Some older surveys did not follow the Global methodology, and are not comparable to other surveys. Please refer to the [DataDetails.xls](#) file for a list of Global and Non-Global surveys.

## **COMPUTING REGIONAL AND INCOME GROUP AVERAGES**

Regional and income group averages of indicators are computed by taking a simple average of country-level estimates. For each economy, only the latest available year of survey data is used in this computation. Only surveys posted during the years 2010-2017, and adhering to the [Enterprise Surveys Global Methodology](#), are used to compute these regional and "all countries" averages.

In June 2017, an inconsistency was found and fixed in the computation of regional and income averages found in the Country Highlights and Country Profiles.

## **HANDLING OF OUTLIERS**

For indicators that use questions with potentially unbounded responses, extreme values are identified and turned into missing as follows. The variables are first log-transformed as  $\ln(x + 1)$ , to add symmetry to the distribution, while including zeros. The observations that fall outside the three standard deviations away from the sample mean of the log-transformed variable at the survey-level are treated as extreme and removed from the calculations of the corresponding indicators (i.e., they are turned into missing).

## Definitions of Subgroup

**Table 1. Definition of Subgroups**

Subgroup	Subgroup levels	Description
Note: The cuts below are included in the levels of sampling stratification. The sufficient sample sizes should ensure the intended level of precision for the indicator values analyzed at these levels. Please refer to the Sampling Note on the Methodology page of the website.		
Firm Size	Small: 5-19 workers Medium: 20-99 workers Large: 100+	Firm size is a composite measure of permanent and temporary workers. The number of temporary workers is adjusted by the average number of months worked in a year.
Location	Varies by Survey	Enterprise Surveys covers selected regions within a country that represent the largest centers of production and business enterprise.
Business Sector	Varies by Survey	Surveys are stratified by business sector. At a minimum, the stratification delineates between Manufacturing and Services firms. In larger economies, additional sectors are selected for stratification.
Note: The cuts below are NOT included in the levels of stratification. The resulting sample sizes are not guaranteed to ensure the intended level of precision for the indicator values analyzed at these levels.		
Gender of Top Manager	Male Female	Respondents are asked to report the gender of the top manager. This variable is only available in the latest surveys using the <b>Global</b> methodology.
Exporting Status	Non-exporter Exporter	A firm is an exporter if at least 10 percent of its annual sales is derived from direct exports
Ownership (Domestic vs. Foreign)	Domestic (less than 10% foreign ownership) At least 10% Foreign Ownership	A firm is considered to have foreign ownership if at least 10 percent of ownership is held by foreigners.

## REGULATIONS

Good economic governance in areas of regulations, permits and licenses are among the fundamental pillars for the creation of a favorable business environment.

The Enterprise Surveys provide qualitative and quantitative measures of regulations. For example, the Enterprise Surveys approximates the “time tax” imposed by regulations: it measures the time spent by senior management in meetings with public officials. Another indicator, the average number of visits or required meetings with tax officials, measures the average number of tax inspections or meetings with tax inspectors in each year.

Effective regulations address market failures that inhibit productive investment and reconcile private and public interests. The number of permits and approvals that businesses need to obtain, and the time it takes to obtain them, are expensive and time consuming. The existing legislation of a country also determines the mix of legal forms private firms take and determines the level of protection for investors thus affecting the incentives to invest. Those indicators focus on the efficiency of business licensing and permit services. The indicators evaluate the delays faced when demanding these services.

Regulations

**[reg1] Senior management time spent in dealing with requirements of government regulation (%)**

Description

Average percentage of senior management's time that is spent in a typical week dealing with requirements imposed by government regulations (eg. Taxes, customs, labor regulations, licensing and registration), including dealings with officials, completing forms, et cetera.

Survey Variable Used to Construct Indicator

This indicator is created from the variable J.2.

<b>J.2</b>	In a typical week over the last year, what percentage of total senior management's time was spent on dealing with requirements imposed by government regulations? [By senior management I mean managers, directors, and officers above direct supervisors of production or sales workers. Some examples of government regulations are taxes, customs, labor regulations, licensing and registration, including dealings with officials and completing forms]
------------	---

	Percent
Senior management's time spent on dealing with regulations	<b>j2</b> %
<b>No time was spent</b>	<b>0</b>
<b>Don't know (spontaneous)</b>	<b>-9</b>

Notes

Indicator Updates

November 18, 2010	<a href="#">Outlier Program Change #2</a> affected outlier treatment on the variable j2.

## TAXES

Taxes play a crucial role in private sector development by providing the necessary public funds to build infrastructure, maintain social services, and create a stable economic environment. Effective tax administration reduces evasion, ensures fairness, and fosters a conducive business climate, thereby encouraging investment and growth in the private sector.

The Enterprise Surveys provide quantitative and qualitative measures of taxation and its administration. For example, the Enterprise Surveys collects information about the visits from tax officials or requirements to meet them, along with the burden of tax compliance and filing. Furthermore, the Enterprise Surveys provides information about firms' perception about the taxes and their administration in their respective economy.

TAXES

**[reg6] Percent of firms visited or required to meet with tax officials**

Description

Percentage of firms that were visited or inspected by tax officials or were required to meet with them over the last year.

## FINANCE

The Enterprise Surveys provide indicators of how firms finance their operations and of the characteristics of their financial transactions. For example, Enterprise Surveys provide indicators that compare the relative use of various sources to finance investment. Excessive reliance on internal funds is a sign of potentially inefficient financial intermediation. Another set of indicators measures the use of financial markets by individual firms. It presents the percentage of working capital that is financed by external sources to the firm, and a measure of the burden imposed by loan requirements measured by collateral levels relative to the value of the loans. Additional indicators focus on the use of financial services by private firms both on the credit side, by measuring the percentage of firms with bank loans or lines of credit, and on the deposit mobilization side, by measuring the percentage of firms with checking or savings accounts.

**[fin23] Percent of firms that are fully credit constrained****Description**

Indicators fin23, fin24, and fin25 are based on Islam and Rodriguez Meza (2023, Islam, Asif Mohammed and Jorge Luis Rodriguez Meza. "How Prevalent Are Credit-Constrained Firms in the Formal Private Sector? Evidence Using Global Surveys". World Bank Policy Research Working Paper; no. WPS 10502). Firms are categorized into fully credit constrained, partially credit constrained, or credit unconstrained as illustrated in the appendix figure. Four sets of survey questions are used for the categorization: (i) whether the firm applied for a loan or line of credit (k16); (ii) if so, what was the outcome of this application (k17); (iii) if it did not apply, the reason for not applying (k20a1); and (iv) whether the firm has access to external finance (variables k3 and k5).

Firms are categorized as fully credit constrained if they do not have access to external finance, and any of the following two conditions are met: (1) the firm did not apply for a loan for any reason other than the lack of need for it; or (2) the firm applied for a loan but the application was rejected, even when it has access to equity financing.

**Survey Variable Used to Construct Indicator**

This indicator is created from the variables: K.3a, K.5a, K.5i, K.16, K.17, K.20a1.

<b>K.3</b>	Over fiscal year <b>[Insert last complete fiscal year]</b> , please estimate the proportion of this establishment's working capital, that is the funds available for day-to-day operations, that were financed from each of the following sources? <b>SHOW CARD 17</b>

**Back to [List of Indicators](#)**

**[fin24] Percent of firms that are partially credit constrained****Description**

Indicators fin23, fin24, and fin25 are based on Islam and Rodriguez Meza (2023, Islam, Asif Mohammed and Jorge Luis Rodriguez Meza. "How Prevalent Are Credit-Constrained Firms in the Formal Private Sector? Evidence Using Global Surveys". World Bank Policy Research Working Paper; no. WPS 10502). Firms are categorized into fully credit constrained, partially credit constrained, or credit unconstrained as illustrated in the appendix figure. Four sets of survey questions are used for the categorization: (i) whether the firm applied for a loan or line of credit (k16); (ii) if so, what was the outcome of this application (k17); (iii) if it did not apply, the reason for not applying (k20a1); and (iv) whether the firm has access to external finance (variables k3 and k5).

Firms are categorized as partially credit constrained if any of the following conditions are met: (1) the firm applied for a loan and the application was partially approved; (2) the firm applied for a loan and the application was rejected, but the firm has access to external sources of finance excluding any equity finance (k5i); or (3) the firm has external finance but did not apply for a loan due to any reason other than no need for it.

**Survey Variable Used to Construct Indicator**

This indicator is created from the variables: K.3a, K.5a, K.4, K.5i, K.16, K.17, K.20a1

<b>K.3</b>	Over fiscal year <b>[Insert last complete fiscal year]</b> , please estimate the proportion of this establishment's working capital, that is the funds available for day-to-day operations, that were financed from each of the following sources? <b>SHOW CARD 17</b>
------------	---

	<b>Percent</b>	<b>DON'T KNOW (SPONTANEOUS)</b>
Internal funds or retained earnings	<b>k3a</b> %	-9
Borrowed from banks: private and state-owned	<b>k3bc</b> %	-9
Borrowed from non-bank financial institutions, which include microfinance institutions, credit cooperatives, credit unions, or finance companies	<b>k3e</b> %	-9
Purchases on credit from suppliers and advances from customers	<b>k3f</b> %	-9
Other, moneylenders, friends, relatives, etc.	<b>k3hd</b> %	-9
	<b>100%</b>	

**INTERVIEWER: CHECK THAT TOTAL SUMS TO 100%  
UNLESS RESPONDENT DOES NOT KNOW**

**K.5** Over fiscal year **[Insert last complete fiscal year]**, please estimate the proportion or **[Insert LCU]** amount of this establishment's total purchases of fixed assets that were financed from the following sources:  
**SHOW CARD 18**

	Percent	OR	Amount [Insert LCUs]	DON'T KNOW (SPONTANEOUS)
Internal funds or retained earnings	<b>k5a</b> %		<b>k5a1</b>	-9
Owners' contribution or issued new equity shares	<b>k5i</b> %		<b>k5i1</b>	-9
Borrowed from banks: private and state-owned	<b>k5bc</b> %		<b>k5bc1</b>	-9
Borrowed from non-bank financial institutions, which include microfinance institutions, credit cooperatives, credit unions, or finance companies	<b>k5e</b> %		<b>k5e1</b>	-9
Purchases on credit from suppliers and advances from customers	<b>k5f</b> %		<b>k5f1</b>	-9

**[fin25] Percent of firms that are credit unconstrained****Description**

Indicators fin23, fin24, and fin25 are based on Islam and Rodriguez Meza (2023, Islam, Asif Mohammed and Jorge Luis Rodriguez Meza. "How Prevalent Are Credit-Constrained Firms in the Formal Private Sector? Evidence Using Global Surveys". World Bank Policy Research Working Paper; no. WPS 10502). Firms are categorized into fully credit constrained, partially credit constrained, or credit unconstrained as illustrated in the appendix figure. Four sets of survey questions are used for the categorization: (i) whether the firm applied for a loan or line of credit (k16); (ii) if so, what was the outcome of this application (k17); (iii) if it did not apply, the reason for not applying (k20a1); and (iv) whether the firm has access to external finance (variables k3 and k5).

Firms are categorized as credit unconstrained if any of the following conditions are met: (1) the firm applied for a loan and the application was approved in full; or (2) the firm did not apply for a loan because it did not need it.

**Survey Variable Used to Construct Indicator**

This indicator is created from the variables: K.16, K.17 and K.20a1.

**K.16** Referring again to the last fiscal year **[insert last complete fiscal year]**, did this establishment apply for any loans or lines of credit?

Yes	1	<i>GO TO QUESTION K.20</i>
No	2

## INFRASTRUCTURE AND CLIMATE

A strong infrastructure enhances the competitiveness of an economy and generates a business environment conducive to firm growth and development. Good infrastructure efficiently connects firms to their customers and suppliers, and enables the use of modern production technologies. Conversely, deficiencies in infrastructure create barriers to productive opportunities and increase costs for all firms, from micro enterprises to large multinational corporations.

The Enterprise Surveys capture the dual challenge of providing a strong infrastructure for electricity, water supply, internet connections, etc., and the development of institutions that effectively provide and maintain public services. These indicators show the extent to which firms are faced with failures in the provision of electricity and the effect of these failures on sales. Inadequate electricity supply can increase costs, disrupt production, and reduce profitability. Additionally, these indicators measure the efficiency of the water supply for the manufacturing sector. Many manufacturing sectors depend on reliable and efficient sources of water for their operations. The indicators can also be used to evaluate the efficiency of infrastructure services by quantifying the delays in obtaining electricity, water, and telephone connections. Service delays impose additional costs on firms and may act as barriers to entry and investment.

Climate plays a pivotal role in private sector development, influencing operational stability and long-term sustainability. The Enterprise Surveys capture measures such as the percentage of firms experiencing damage to physical assets due to extreme weather, which highlight the vulnerability of businesses to climate risks. Additionally, the Enterprise Surveys provides information about the share of firms monitoring their CO2 emissions and those adopting energy management measures, thus providing measures about the firms' proactive approach to mitigating environmental impact and ensuring resilient, sustainable growth.

**[in16] Percent of firms experiencing electrical outages**

Description

Percentage of firms that experienced power outages over the last complete fiscal year.

Survey Variable Used to Construct Indicator

This indicator is created from the variable C.6

**C.6** Over fiscal year [\[insert last complete fiscal year\]](#), did this establishment experience power outages?

Yes	1

## GENDER

The Enterprise Surveys provide indicators that describe several dimensions of gender composition in the workforce. It also collects information on the characteristics of the workforce employed in the non-agricultural private economy. The set of indicators presents the composition of the firm's workforce by type of contract and gender. Labor regulations have a direct effect on the type of employment favored by firms and they may have a different impact by gender. Other indicators present the composition of the workforce classified into temporary and permanent workers and reflect the participation of women in regular full time employment, along with the firms' inclusion of women in formal trainings.

GENDER

**[gend1] Percent of firms with women participation in ownership**

Description

Percentage of firms with females among the owners.

Survey Variable Used to Construct Indicator

This indicator is created from the variable B.4.

**B.4** Amongst the owners of the firm, are there any females?

Yes	1
No	2
<b>Don't know (spontaneous)</b>	<b>-9</b>

**b4**

## TRADE

Open markets allow firms to expand, raise standards for efficiency on exporters, and enable firms to import low cost supplies. However, trading also forces firms to deal with customs services and trade regulations, obtain export and import licenses, and in some cases, firms also face additional costs due to losses during transport. The Enterprise Surveys collect information on the operational constraints faced by exporters and importers and quantifies the trade activity of firms. Indicators provide a measure of the intensity of foreign trade in the private sector.

**[tr10] Percent of firms exporting directly or indirectly at least 1% of sales**

## Description

Percentage of firms that export directly or indirectly.

## Survey Variable Used to Construct Indicator

This indicator is created from the variables D.3b and D.3c.

## COMPETITION AND PUBLIC PROCUREMENT

Competition is vital to private sector development, fostering innovation, efficiency, and growth. The Enterprise Surveys provide multiple measures of market competition, such as, the number of competitors as reported by firms themselves. A healthy competitive environment is indicated by a higher percentage of firms reporting more than five competitors in their main product's market, reducing the likelihood of monopolistic practices and promoting consumer choice.

Public procurement practices significantly impact private sector growth. Firms' perceptions of the difficulty in complying with government contract tender requirements reflect the accessibility and transparency of public procurement processes. Simplified, fair, and transparent tender requirements encourage more firms to participate, fostering competition and ensuring better value for public spending.

**[comp1] [B-READY] Index of market share of the largest competitor (excluding firms whose main market is international)**

Description

The market share of firms' largest competitor, in terms of sales, in the market where these firms sold their main product or offered their main service.

## CORRUPTION

Corruption by public officials may present a major administrative and financial burden on firms. Corruption creates an unfavorable business environment by undermining the operational efficiency of firms and raising the costs and risks associated with doing business.

Inefficient regulations constrain firm efficiency as they present opportunities for soliciting bribes where firms are required to make “unofficial” payments to public officials to get things done. In many countries bribes are common and quite high and they add to the bureaucratic costs in obtaining required permits and licenses. They can be a serious impediment for firms’ growth and development.

The Enterprise Surveys include several indicators for corruption. The Bribery depth reflects the proportion of times a firm was asked or expected to pay a bribe when soliciting six different public services, permits or licenses. Other indicators identify the extent to which specific regulatory and administrative officials require bribe payments during meetings with tax inspectors or to secure a government contract. Another set of indicators focuses on bribes to obtain specific licenses or permits, and shows the share of firms that are expected to make informal payments to secure import and operating licenses and to obtain a construction permit

## CORRUPTION

**[graft3] Bribery incidence (percent of firms experiencing at least one bribe payment request)**

## Description

The percent of firms experiencing at least one bribe payment request across 6 public transactions dealing with utilities access, permits, licenses, and taxes. The six public transaction questions are listed below. For purposes of computation, a refusal to answer a particular survey question is considered an affirmative answer.

## Survey Variable Used to Construct Indicator

This indicator is created from the variables C.5., C.14, G.4, J.5, J.12, J.15

**[graft2] Bribery depth (% of public transactions where a gift or informal payment was requested)**

## Description

The depth of Bribery is the percentage of instances in which a firm was either expected or requested to provide a gift or informal payment during solicitations for public services, licenses or permits. This measure uses data from 6 survey questions for each firm. For purposes of computation, a refusal to answer a particular survey question is considered an affirmative answer.

## Survey Variable Used to Construct Indicator

#### Notes

#### Indicator Updates

August 18, 2011	Indicator Created. Bribery depth is computed similarly as the Graft Index from A. Gonzalez et al. 2007. World Bank Policy Research Working Paper #4394. Unlike the Graft Index, Bribery depth does not include telephone connections transactions and does include transactions conducted during meetings with tax officials. Another difference is that Bribery depth is calculated at the firm-level unlike the Graft Index which is calculated at the country-level.
-----------------	---

**Back to [List of Indicators](#)**

## CORRUPTION

**[graft1] Graft index**

## Description

This measure is based on A. Gonzalez et al. 2007. World Bank Policy Research Working Paper #4394, and is a precursor of graft2. Graft Index is the percentage of instances in which a firm was either expected or requested to provide a gift or informal payment during solicitations for public services, licenses or permits. This measure uses data from 6 survey questions for each firm. For purposes of computation, a refusal to answer a particular survey question is considered an affirmative answer. Unlike graft2, which was created later, graft1 includes telephone connections and excludes meetings with tax officials.

## Survey Variable Used to Construct Indicator

This indicator is created from the variables C.21, C.5, C.14, G.4, J.12, and J.15

**C.21** In reference to that application for a telephone connection, was an informal gift or payment expected or requested?

Yes	1
No	2
Don't know (spontaneous)	-9
REFUSE (spontaneous)	-8

c5

**C.5** In reference to that application for an electrical connection, was an informal gift or payment expected or requested?

Yes	1
No	2
Don't know (spontaneous)	-9
REFUSE (spontaneous)	-8

c5

**C.14** In reference to that application for a water connection, was an informal gift or payment expected or requested?

Yes	1
No	2
Don't know (spontaneous)	-9
REFUSE (spontaneous)	-8

c14

**G.4** In reference to that application for a construction-related permit, was an informal gift or payment expected or requested?

Yes	1
No	2
Don't know (spontaneous)	-9
REFUSE (spontaneous)	-8

g4

**J.12** In reference to that application for an import license, was an informal gift or payment expected or requested?

Yes	1
No	2
Don't know (spontaneous)	-9
REFUSE (spontaneous)	-8

j12

**J.15** In reference to that application for an operating license, was an informal gift or payment expected or requested?

Yes	1

## INFORMALITY

A large informal sector has serious consequences for the formal private sector. The informal sector may pose unfair competition for formal firms. The Enterprise Surveys capture key dimensions the degree of informality in an economy. For example, the set of indicators (unregistered start-ups) shows the percentage of firms that started operation without being formally registered. It approximates the prevalence of informality in the private economy.

INFORMALITY

**[infor1] Percent of firms competing against unregistered or informal firms**

Description

Percentage of firms competing against unregistered or informal firms.

Survey Variable Used to Construct Indicator

This indicator is created from the variable E.11.

**E.11** Does this establishment compete against unregistered or informal firms?

## DISPUTE RESOLUTION

Robust dispute resolution and contract enforcement mechanisms are essential for private sector development, as they ensure the predictability and security of commercial transactions. A high percentage of firms experiencing commercial disputes highlights the need for effective mechanisms to address conflicts and uphold contractual obligations. Efficient dispute resolution systems, including courts, arbitration, mediation, and conciliation, provide businesses with avenues to resolve conflicts, maintain relationships, and secure their investments. The Enterprise Surveys provide multiple quantitative and qualitative measures of the business environment measures relevant to dispute resolution, and contract enforcement in general, including several measures of firms' perceptions about the courts, and alternative dispute resolution mechanisms.

## DISPUTE RESOLUTION

**[disp1] Percent of firms that had any commercial dispute**

## WORKFORCE

The Enterprise Surveys provide indicators that describe information on the characteristics of the workforce employed in the non-agricultural private economy. The set of indicators presents the composition of the firm's workforce by type of contract and gender, the composition of the workforce classified into temporary and permanent workers, and reflects the participation of women in regular full-time employment. Labor regulations have a direct effect on the type of employment favored by firms and they may have a different impact by gender.

WORKFORCE

**[wk1] [B-READY] Percent of firms offering formal training over last fiscal year**

Description

## MANAGEMENT PRACTICES

The Enterprise Surveys provide indicators that describe several dimensions of management practices. These indicators measure the extent to which firms implement better practices such as taking long-term actions to fix and avoid problems in production or service-delivery; number, time-horizon, and other features of production or service-provision targets; use of bonuses or promotion to reward better performance, and demotion to limit under-performance. A subset of survey questions developed by Bloom and Van Reenen (2007, Bloom, Nicholas, and John Van Reenen. "Measuring and explaining management practices across firms and countries." The quarterly journal of Economics 122, no. 4 (2007): 1351-1408) were adapted and implemented as part of the Enterprise Surveys across countries. An important change in the survey methodology was avoiding double-barrelled questions by adding filters. Double-barrelled questions can lead to over reporting if the topic being measured is prone to desirability bias; better management practices are arguably more desirable for good managers. For example, the number of production or service-provision targets is asked in two parts in the Enterprise Surveys: the firms are first asked if they have such targets, and those that say Yes are then asked a follow-up question on the number of such targets. This is methodologically different from asking about this in one question, with "No target" being a response category among the range of targets. The Enterprise Surveys team is documenting the important repercussion this methodological change has on the estimates of management practices in an upcoming research paper.

For the Enterprise Surveys indicators on management practices, the response categories were mapped into the values of the indicator following the coding conventions given in the Table A2 in Bloom, Nicholas, Erik Brynjolfsson, Lucia Foster, Ron Jarmin, Megha Patnaik, Itay Saporta-Eksten, and John Van Reenen. "What drives differences in management practices?" American Economic Review 109, no. 5 (2019): 1648-1683. In this mapping, the responses that suggest the most structured management practice are normalized to 100, and the ones suggesting the least structured are normalized to zero. Bloom et al. (2019) define more structured management practices as those that are more specific, formal, frequent or explicit. It is thus expected that higher levels of these indicators mean better management practices. Note that the management practices indicators are calculated for firms with at least 20 employees, and uninformative responses (i.e., "don't know") are treated as missing.

MANAGEMENT PRACTICES

**[mgmt1] Management practices index**

Description

Composite index that combines information from eight management practices indicators that are described below (please see mgmt2 through mgmt9 starting on the next page). It is calculated as follows:

$$mgmt1_i = \frac{\sum_{j=2}^9 mgmtj_i}{8}$$

where  $mgmtj_i = [0,100]$  is management practice  $j$  (2 through 9) by business  $i$ , averaged over all 8 components. Observations for which all 8 components are available are used. Due to this structure, mgmt1 varies between 0 and 100. This composite index and all its 8 components are calculated only for establishments with 20 or more employees.

Survey Variable Used to Construct Indicator

This composite indicator is created from the following variables: R.1, R.2, R.3, R.4, R.5, R.6, R.7, R.8, R.9, R.10, R.11.

MANAGEMENT PRACTICES

**[mgmt2] Score on action when a problem arose**

Description

What best describes what happens at your firm when a problem in the production process arises? Examples of problems include: finding a quality defect in a service, product, or a piece of equipment breaks down. To map between response categories and values of the indicator, the coding conventions are used as in the Table A2 in Bloom, Nicholas, Erik Brynjolfsson, Lucia Foster, Ron Jarmin, Megha Patnaik, Itay Saporta-Eksten, and John Van Reenen. "What drives differences in management practices?" *American Economic Review* 109, no. 5 (2019): 1648-1683. In particular, the coding conventions are as follows: r1==3 is coded as 100; r1==2 is coded as 66.67; r1==1 is coded as 33.33; r1==4 is coded as 0.

Survey Variable Used to Construct Indicator

This indicator is created from the variable R.1.

<b>R.1</b>	<p><b>ASK IF MANUFACTURING</b> Over fiscal year <b>[Insert last complete fiscal year]</b>, what best describes what happened at this establishment when a problem in the production process arose?</p> <p><b>ASK IF SERVICES</b> Over fiscal year <b>[Insert last complete fiscal year]</b>, What best describes what happened at this establishment when a problem in the provision of services arose?</p>
------------	---

MANAGEMENT PRACTICES

**[mgmt3] Score on number of performance indicators monitored**

Description

Over the last complete fiscal year, how many key performance indicators are monitored in this firm? Examples of key performance indicators include: metrics on service quality, customer satisfaction, production, cost, waste, quality, inventory, and absenteeism. To map between response categories and values of the indicator, the coding conventions are used as in the Table A2 in Bloom, Nicholas, Erik Brynjolfsson, Lucia Foster, Ron Jarmin, Megha Patnaik, Itay Saporta-Eksten, and John Van Reenen. "What drives differences in management practices?" *American Economic Review* 109, no. 5 (2019): 1648-1683. In particular, the coding conventions are as follows: r3==3 is coded as 100; r3==2 is coded as 66.67; r3==1 is coded as 33.33; r2==2 is coded as 0. As mentioned in the introduction, this is an example of when a double-barrelled survey question from Bloom et al. (2019) was split in two, by adding a filer. Repercussions of this methodological change is being investigated by the Enterprise Surveys team in an upcoming working paper.

Survey Variable Used to Construct Indicator

This indicator is created from variables R.2 and R.3.

MANAGEMENT PRACTICES

**[mgmt5] Score on achievability of production/service provision targets**

Description

How easy or difficult is it in your firm for people to typically achieve their operational targets? To map between response categories and values of the indicator, the coding conventions are used as in the Table A2 in Bloom, Nicholas, Erik Brynjolfsson, Lucia Foster, Ron Jarmin, Megha Patnaik, Itay Saporta-Eksten, and John Van Reenen. "What drives differences in management practices?" *American Economic Review* 109, no. 5 (2019): 1648-1683. In particular, the coding conventions are as follows: r6==4 is coded as 1; r6==3 is coded as 0.75; r6==2 is coded as 0.5; r6==5 and r6==6 are coded as 0.25; r6==1 and r4==2 are coded as 0. Notice that 'Targets not achieved' (r6=6) and 'Only achieved with extraordinary effort' (r6=5) were coded together as 0.25; and 'Achieved without much effort' (r6==1) and 'No targets' (r4=2) were coded together as 0. As mentioned above, this is another example of when a double-barrelled survey question from Bloom et al. (2019) was split in two, by adding a filer (R.4). Repercussions of this methodological change is being investigated by the Enterprise Surveys team in an upcoming working paper.

Survey Variable Used to Construct Indicator

This indicator is created from variables R.4 and R.6.

<b>R.4</b>	<b>ASK IF MANUFACTURING</b> Over fiscal year [Insert last complete fiscal year], did this establishment have production targets? Examples of production targets are volume, quality, efficiency, waste, or on-time delivery.

## **INNOVATION AND TECHNOLOGY**

The Enterprise Surveys provide indicators that describe several dimensions of technology use and innovation. These indicators measure the extent to which firms invest in obtaining recognized certificates of production and accounting practices. Obtaining international quality certifications may support creating more efficient or effective operations and improve employee's motivation, awareness, and morale. They also provide a sign of high quality that may help reduce waste and increase productivity. Additionally, these indicators demonstrate the use of information and communications technologies (ICT) in business transactions. ICT, such as the Internet, are important tools for all firms because they provide even the smallest of enterprises with the ability to reach national and international markets at lower cost.

**[t7] Percent of firms that introduced a new product/service over last 3 years**

## FIRM PROFILE

In addition to collecting information on the business environment, Enterprise Surveys collect information on the performance of the firms interviewed. Firms are asked about their annual sales figures and number of permanent full-time employees at the end of the last fiscal year as well as three fiscal years ago.

Indicators show the performance of firms by growth in sales, employment, and labor productivity. All sales data have been converted to 2009 U.S. dollars for global comparability. While different countries will have different growth patterns, comparing performance within a country by firm size or industry or other firm subgroups can yield interesting insights for policymakers and researchers.

Furthermore, Enterprise Surveys collect information on the characteristics of the firms interviewed. Given that the surveys are representative of the corresponding Enterprise Surveys universe, the data collected provides a description of the representative private firm in the country and an estimate of how some of the attributes of the average firm are distributed across the population of firms.

Indicators show the distribution of firms according to their age measured by the number of years they have been in operation. The effect the business environment can have on the private sector may depend on firms' experience and longevity. Seasoned firms and young firms may differ in their ability to successfully navigate the business environment.

Indicators also quantify the level of female participation in management and firm ownership. These indicators can help assess whether gender influences the level of exposure of the firm to external factors, such as corruption, access to finance, and technology.

Finally, indicators show the participation of the domestic private sector, the government, the foreign sector and other sectors in the ownership of the typical firm. The distribution provides insight into their levels of equity in the private sector of the economy.

FIRM PROFILE

[perf1] Real annual sales growth (%)

Description

Real annual sales growth is measured as a percentage change in sales between the last completed fiscal year and a previous period. All sales values are deflated to 2009 using each country's GDP deflators.<sup>2</sup> The formula is:

$$\left(\frac{1}{t}\right) * \frac{d2' - n3'}{(d2' + n3')/2} * (100)$$

where  $t$  is the number of years between the current and previous periods, and  $d2'$  and  $n3'$  are deflated values of  $d2$  and  $n3$  variables. Note that the GDP deflators are weighted by the closing month of each firms' fiscal year. For example, if a firm's last complete fiscal year spans July 2015 through June 2016, then deflator used for  $d2$  is:  $\frac{6}{12} \cdot \text{deflator for year 2015} + \frac{6}{12} \cdot \text{deflator for year 2016}$ .

Survey Variable Used to Construct Indicator

This indicator is created from the variables D.2 and N.3.

**D.2** In fiscal year **[insert last complete fiscal year]**, what were this establishment's total annual sales for **ALL** products and services?

	LCUs
Last complete fiscal year's total sales	<b>d2</b>

<sup>2</sup> GDP deflators are from the World Development Indicators, series NY.GDP.DEFL.ZS

FIRM PROFILE

[perf2] Annual employment growth (%)

Description

Annualized growth of permanent full-time workers expressed as a percentage. Annual employment growth is the change in full-time employment reported in the current fiscal year from a previous period. For most countries the difference between the two fiscal year periods is two years. However, for some countries the interval is three years. Hence, an annualized measure is used. The formula is

$$\left(\frac{1}{t}\right) * \frac{l1 - l2}{(l1 + l2)/2} * (100)$$

where *t* is the number of years between the current and previous periods.

Survey Variable Used to Construct Indicator

This indicator is created from the variables L.1 and L.2.

<b>L.1</b>	At the end of fiscal year <b>[insert last complete fiscal year]</b> , how many permanent, full-time individuals worked in this establishment? Please include all employees and managers (Permanent, full-time employees are defined as all paid employees that are contracted for a term of one or more fiscal years and/or have a guaranteed renewal of their employment contract and that work a full shift) <b>(INTERVIEWER: INCLUDE INTERVIWEE IF APPLICABLE).</b>
------------	--

	Number
Permanent, full-time workers end of last fiscal year	<b>11</b>
<b>DON'T KNOW (SPONTANEOUS)</b>	<b>-9</b>

<b>L.2</b>	Three fiscal years ago, at the end of fiscal year <b>[insert three complete fiscal years ago]</b> , how many permanent, full-time individuals work in this establishment? Please include all employees and managers <b>(INTERVIEWER: INCLUDE INTERVIWEE IF APPLICABLE).</b>
------------	--

	Number
Permanent, full-time workers three fiscal years ago	<b>12</b>
<b>IF ESTABLISHMENT WAS NOT IN BUSINESS THREE YEARS AGO</b>	<b>-7</b>
<b>DON'T KNOW (SPONTANEOUS)</b>	<b>-9</b>

FIRM PROFILE

**[perf3] Real annual labor productivity growth (%)**

Description

Annual labor productivity growth is measured by a percentage change in labor productivity between the last completed fiscal year and a previous period, where labor productivity is sales divided by the number of full-time permanent workers. All sales values are deflated to 2009 using each country's GDP deflators.<sup>3</sup> The formula is:

$$\left(\frac{1}{t}\right) * \frac{\left(\frac{d2'}{l1}\right) - \left(\frac{n3'}{l2}\right)}{\left\{\left(\frac{d2'}{l1}\right) + \left(\frac{n3'}{l2}\right)\right\}/2} * (100)$$

where  $t$  is the number of years between the current and previous periods,  $l1$  and  $l2$  are the number of full-time permanent workers, and  $d2'$  and  $n3'$  are deflated values of  $d2$  and  $n3$  variables. Note that the GDP deflators are weighted by the closing month of each firms' fiscal year. For example, if a firm's last complete fiscal year spans July 2015 through June 2016, then deflator used for  $d2$  is:  $\frac{6}{12} \cdot$  deflator for year 2015 +  $\frac{6}{12} \cdot$  deflator for year 2016.

Survey Variable Used to Construct Indicator

This indicator is created from the variables D.2, N.3, L.1, and L.2.

**D.2** In fiscal year **[insert last complete fiscal year]**, what were this establishment's total annual sales for **ALL** products and services?

## **BIGGEST OBSTACLE**

The Enterprise Surveys collect mostly quantitative and factual information (the actual day-to-day experiences) from business owners and managers on a range of topics regarding the business environment. Towards the end of the survey interview, there is an opinion-based question asked to the survey respondent that pulls together the various survey topics. Firms are asked to consider which element (out of a list of 15) is the Biggest Obstacle to their establishment. The following group of indicators summarizes how many firms chose each of the various 15 elements. These indicators can aid policymakers in setting priorities when creating programs and policies aimed at improving the business-enabling environment.

**BIGGEST OBSTACLE**

**[obst1] Percent of firms choosing access to finance as their biggest obstacle**

**Description**

Percentage of establishments that consider access to finance to be the Biggest Obstacle

**Survey Variable Used to Construct Indicator**

This indicator is created from the variables M.1.

**M.1** By looking at card [insert card number] can you tell me which of the elements of the business environment included in the list, if any, currently represents the biggest obstacle faced by this establishment **SHOW CARD 25**

## CRIME

Crime imposes costs on firms when they are forced to divert resources from productive uses to cover security costs. Both foreign and domestic investors perceive crime as an indication of social instability, and crime drives up the cost of doing business. Also, commercial disputes between firms and their clients occur regularly while doing business. Resolving these disputes can be challenging when legal institutions are weak or nonexistent.

The Enterprise Surveys capture key dimensions of the effect of crime on firm sales, the extent to which entrepreneurs identify courts as fair and more. For example, the set of indicators measures the direct costs of security incurred by firms as well as their direct losses due to crime. These resources represent an opportunity cost since they could have been invested in productive activities. Another indicator (Perceptions about the Courts) shows the share of firms that recognize the functioning of the courts as being fair, impartial, and uncorrupted.

CRIME

**[crime1] Percent of firms paying for security**

Description

Percentage of firms paying for security, for example equipment, personnel, or professional security services.

Survey Variable Used to Construct Indicator

This indicator is created from the variable I.1.

<b>I.1</b>	In fiscal year <b>[insert last complete fiscal year]</b> , did this establishment pay for security, for example equipment, personnel, or professional security services?
------------	--

Yes	1	
No	2	<i>GO TO QUESTION I.3</i>

## DESCRIPTIONS OF INDICATOR UPDATES

### **Outlier Program Change 1 (Summer 2009)**

**Background:** Data collected by the Enterprise Surveys Unit is cleaned as it is collected and checked against a number of quality controls. However, not all data presented through the Enterprise Surveys website is collected by the Enterprise Surveys Unit. For a series of variables, outlier values are identified and removed before the variable is used to construct indicators. A conservative approach is used in this analysis and researchers may wish to use their own techniques to identify outliers by accessing the original raw-data files and performing their own analysis. Variables collected with a response scale form 0% to 100% (e.g. Senior management's time spent on dealing with regulations) are subjected to trimming at plus and minus three standard deviations from the mean. Variables collected with unbounded responses (e.g. Total annual sales figures or Days to obtain an import license) are first log-transformed before being trimmed at plus and minus three standard deviations from the mean.

**Change:** For variables affected by this change, outlier analysis is performed on the log transformation of the variable. In previous versions of outlier programs, 0.0001 was added to zero values. After the change, 1 is added to all values before performing outlier analysis on the log value. This change was done to preserve zero values when running outlier analysis on logs. Performing the outlier analysis by survey, log values greater (less) than three times the standard deviation from the mean are considered outliers and replaced with a missing value.

### **Outlier Program Change 2 (November 18, 2010)**

Outlier analysis was previously run at the country level. With the addition of new surveys and multiple surveys in the same country, outlier analysis is now run at the survey level.

### **Indicator Minus Value Change (December 7, 2010)**

For the construction of some corruption indicators, negative values (-8 and -9) are changed to extended missing (.a or .b) and are no longer included in the outlier analysis.

### **Changes to ECA 2002 & 2005 Surveys (May 2, 2011)**

The Enterprise Surveys team has made a change to indicators computed for the 2002 and 2005 rounds of surveys conducted in Europe and Central Asia (ECA). This change reflects the exclusion of observations in some sectors in an effort to improve comparability of these data with the more recent rounds of survey collection.

### **Refusal response incorporation for corr2 indicator (May 1, 2014)**

The Enterprise Surveys team has made a correction to the corr2 indicator. Due to some error in the code corr2 did not include refusals to the variable j6. This has now been corrected.

### **Change of denominator for gend3 indicator (Feb 3, 2014)**

The Enterprise Surveys team has made a correction to the gend3 indicator. Inappropriate denominator was used to calculate gend3. This has now been corrected.

### **Creation of new indicator gend5 (Feb 3, 2014)**

The Enterprise Surveys team has created a new indicator gend5 in topic for gender.

**Removal of out of date indicators (May 29, 2014)**

Indicators that were out of date have been removed from ES website.

**Creation of new indicator perf4 (Nov 11, 2014)**

The Enterprise Surveys team has created a new indicator perf4 in topic for performance.

**Creation of new indicator gend6 (Aug 20, 2015)**

The Enterprise Surveys team has created a new indicator gend6 in topic for gender.

**Methodology change in indicators perf1 and perf3 (Dec 15, 2016)**

The Enterprise Surveys team has decided to deflate sales values using the country-level GDP deflators instead of converting them to USD and then deflating using the US GDP deflator.

**Creation of 12 new indicators (June 26, 2017)**

The Enterprise Surveys team has created 12 new indicators: reg6 for regulation and taxes, fin22 for finance, in16 and in17 for infrastructure, tr17 and tr16 for trade, car7 and car 8 for firm characteristics, and lastly t7, t8, t9, and t10 for innovation and technology.

**Creation of 6 new indicators (August 7, 2017)**

The Enterprise Surveys team has created 6 new indicators: wk14, wk15, wk16, wk17, wk18, and wk19 on the topic of workforce.

**Methodology change in perf1 and perf3 (September 11, 2017)**

GDP deflators are now adjusted for the structure of each firm's fiscal year. In particular, we use the closing month of the firms' fiscal year to weigh the annual deflators from WDI accordingly.

**Methodology change in t10 (January 30, 2023)**

The indicator is restricted to establishments with 20 or more employees.

**Creation of 9 new indicators (May 15, 2023)**

The Enterprise Surveys team has created 9 new indicators: mgmt1-mgmt9 on the topic of management practices.

**Creation of 3 new indicators and a correction (June 26, 2023)**

The Enterprise Surveys team has created 3 new indicators: fin23, fin24, and fin25, on the topic of credit constraints. Also, correction was made to handle r10 = -7 as described above, instead of inadvertently treating it as missing.

**Correction to make an indicator manufacturing-only as originally intended (August 21, 2023)**

The Enterprise Surveys team has made a correction to the tr1 indicator. Due to an error in the code tr1 did not exclude services sector. This has now been corrected.

**Corrections to indicators gend2 gend3 gend5 in3 in3\_c in4 in4\_c in15 (June 3, 2024)**

The Enterprise Surveys team has removed rounding to the nearest 0.5 from indicators gend2, gend3, gend5, in4 and in4\_c. For in4 and in4\_c, a coding typo was corrected to avoid inadvertently imputing 0s when the indicator

should not be calculated; and outlier routine was applied to the indicator itself, not the individual components. For indicators in3, in3\_c and in15, the indicator is not calculated when one of the components (c8b) is “don’t know”.

**Creation of 66 new indicators (July 5, 2024)**

The Enterprise Surveys team has created 66 new indicators, spanning all the topics previously covered and adding several new (e.g., climate, dispute resolution). The new indicators also include the ones that feed into the first Business Ready (B-READY) report. All the indicators that feed into the B-READY report (including the previously existing WBES indicators) are marked with [B-READY] in the label of the corresponding variable.

The full list of newly created indicators is as follows: reg9 reg10 reg11 reg12 tax1 tax2 tax3 tax4 tax5 tax6 tax7 tax8 fin26 fin27 fin28 fin29 fin30 fin31 fin32 fin33 in18 in19 in20 in21 in22 in23 in24 in25 in26 gend7 gend8 gend9 tr18 tr19 tr20 tr21 tr22 tr23 tr24 tr25 tr26 comp1 comp2 comp3 comp4 comp5 comp6 comp7 comp8 comp9 disp1 disp2 disp3 disp4 disp5 disp6 wk20 wk21 wk22 wk23 wk24 wk25 wk26 wk27 wk28 t11
